Summary

Software engineer and technical consultant building business systems and data workflows, transitioning into applied AI systems with a focus on pragmatic integration, operational reliability, and architecture depth.

Experience

- G&G Professional Services**, Technical & Data Consultant

- Builds and evolves client business systems across logistics, procurement, sales, accounting, and CRM domains in live operational environments.
 - Delivered EBS workflow and reporting capabilities across 6 warehouses and 30 routes, improving execution visibility and cross-team coordination.
 - Led Odoo upgrade streams to v18, including legacy continuity constraints and process redesign for CDA and Sentech.

Dakar, Senegal
July 2025 – present
- LIC**, Product, Data & Solutions Consultant

- Translates user and business requirements into implementation-ready product scopes for web/mobile commerce and operations products.
 - Supports KPI and data-flow structuring for product decisions and iterative delivery planning.

Dakar, Senegal / Remote
Aug 2025 – present
- Teksi**, Freelance Full-Stack Developer

- Developing a Student Management Service with Spring Boot and Angular on a multi-tenant model, deployed with Docker on DigitalOcean.

Remote
Apr 2025 – present

Applied AI & Systems Projects

Built data and KPI workflows for ERP and business operations contexts, using SQL/Pandas pipelines and dashboard-oriented outputs.

Prototyped lightweight retrieval-oriented tooling in constrained environments to explore practical AI augmentation patterns.

Delivered architecture decisions balancing business constraints, maintainability, and deployment speed.

Technical Stack

- Backend & Data:** Spring Boot, SQL, Pandas, scikit-learn, API design
- Systems & Platform:** Odoo 18, PostgreSQL, Docker, Linux, DigitalOcean, CI/CD
- Product & Delivery:** requirements framing, technical documentation, stakeholder communication, user training

Education

- Dakar Institute of Technology**, Master's in Artificial Intelligence

Mar 2026 – present
- Higher Institute of Computer Science (ISI)**, Bachelor's in Software Engineering

Sept 2025

Applied AI Development (Selected)

DataCamp — AI Engineer for Developers Associate: practical model and workflow integration for application contexts.

Google/Coursera — Google AI Professional Certificate: broad applied AI concepts for product-level implementation.

Linux Foundation (LFD114) — Porting Software to RISC-V: systems-level rigor relevant to software portability and architecture thinking.

Languages

Spoken Languages: French, English, Wolof, Pulaar (fluent); Arabic, Spanish (intermediate)
